SUMMARY Hardware and Software Engineering, Diploma in Finance and Investments. Experience in Technological Project Management in multinational companies. Design Thinking, Cost Analysis, Financial Projections, different types of database management systems. I'm able to translate the non-technical language into technical, able to understand the user and the machine. I have participated in different technology projects and led Multidisciplinary teams. I am good in Physics, Maths, creating valuable applications with simple user interfaces and setting up high-demand technology infrastructures.

COMPETENCES

- Programming Cryptocurrencies or Blockchains.
- Programming Google Scripts as plugins for Google Spreadsheet, Docs and Forms.
- Android and iOS Apps programming React, VUE, Angular or similars.
- Rest Services (JSON) layer programming in Python.
- Lead Technical and Non-Technical Teams (Software and Hardware).
- Program automated emails, notification or tasks according SpreadSheet rules.
- Deploy and performance improvement for high-demand infrastructures in Google Cloud services.
- Hardware Programming (Assembly, C, Python, JavaScript).
- Automated Scrapping.

ACADEMIC BACKGROUNDS

2014 – 2014   **Universidad de Chile** (www.fen.uchile.cl)

Finance and Investing Diploma (Graduated)

2009 – 2010   **Universidad de Santiago de Chile** (www.usach.cl)

Bachelor of Computer Science (Graduated)

2004 – 2009   **Universidad de Santiago de Chile** (www.usach.cl)

Computer Scientist and Engineer, Software Development (Graduated)

1999 – 2001   **Universidad Federico Santa María** (www.utfsm.cl)

Electronics Technician (Graduated)

1995 – 1998   **Liceo Diego de Almeida** (fees.cl/lda)

Computer Programmer (Graduated)

LANGUAGES : Spanish, English, Portuguese.

EXPERIENCIA LABORAL

Hardware Industry   Apr, 2017 - present

» CTO

- Planning and budgeting of technology projects including software and hardware.
- Execution and leadership of multidisciplinary teams.
- Management and Coordination of research teams (Engineers, Docs and Postdocs)

Fintech Industry   Feb, 2008 - Abr. 2017

» CTO

- Design and planning of Architecture and Systems for multi-layered banking applications. (ISO 20000)
- Partnership manager for Google Cloud and a Chilean company.
- Evaluation of services for improvements (ITIL) to improve customer experience.
- Management and leadership of research and development teams.
- Project management in various latest technologies in Software and Security.

» Software Engineer Mobile Platforms

- Creation of a framework in JavaScript for the development of mobile applications, when most of the frameworks (such as Sencha Touch, jQuery Mobile, Angular, React) did not exist.
- Creation of a mobile application for authentication for a Chilean Bank with OTP security tokens.

» Risk Analyst Engineer

- Construction of operational risk control projects.

StarTechConf - www.startechconf.com   Ene, 2011 - Dic 2015

» Creator and Co-Organizer

- Creation and coordination of one an important conferences in South America for technology. Constituted non-profit and with more than a thousand attendees from around the world. Exponents of companies such as Google, Apple, Microsoft, among others, in one place.

Software Industry   Jan, 2001 - May 2012

» Software Engineer

- Coordination and Creation of User Generated Content systems (Node.js, Sencha Touch and MongoDB)

» Risk Analyst Engineer

- Construction of operational risk control projects.
